EDUCATION

Northeastern University

Bachelor of Science in Computer Science and Financial Technology, Deans List

Boston, MA

Aug. 2021 – Dec. 2025

EXPERIENCE

Founding Engineer

Patient Health Assistant

Aug. 2024 – Present

Remote

- Built and deployed a **patient-facing AI health platform** used by **15+ patients** and a network of **10+ doctors** for accurate, accessible health Q&A.
- Fine-tuned Google Gemini with domain-specific guardrails, achieving **91% accuracy** on clinical queries while ensuring safe and compliant responses.
- Engineered a **Python + Docker backend** with sub-200ms latency, deployed on GCS, enabling reliable and scalable performance.
- Integrated with **Epic Systems' FHIR APIs** to securely retrieve EHR data, ensuring HIPAA-compliant workflows.

Software Engineer Co-op

MORSE Corp

Jan. 2025 – June 2025

Cambridge, MA

- Built and deployed large-scale runtime validation system for ML algorithms, raising data compliance from **23%** to **95%**.
- Integrated YOLOv8 detection models into production inference pipelines, optimizing PyTorch ops to cut GPU memory usage by **76%** and enabling faster, more cost-efficient scaling.
- Led 3-person team to ship AI-driven data quality assessment tooling with **Polars**, completing ahead of schedule.

Quantitative Analytics Intern

PNC Bank

May 2024 – Aug. 2024

New York City, NY

- Built Gradient Boosting model achieving **0.81 AUC** to detect early consumer delinquency, presented findings to C-level executives.
- Architected SQL + Python pipeline to process millions of records for real-time investment tracking, cutting decision time by **63%**.

Technical Project Management Intern

SiPhox Health

June 2023 – May 2024

Burlington, MA

- Developed full-stack order tracking system with **React** front-end and **ExpressJS/MongoDB** back-end, deployed for company-wide use.
- Engineered personalization system with Typeform API, **Python**, and Zapier, shipping production system that drove **\$4K monthly revenue** with 4% conversion.
- Supported go-to-market by integrating customer feedback into tools, presenting at conferences, and securing **\$5K B2B deals**.

PROJECTS

RAG Benchmarking Tool | *Python, ClickHouse, PostgreSQL, Docker, Streamlit*

June 2025 – July 2025

- Built microservices system benchmarking vector DB performance with **FastAPI**, containerized with Docker for scalable deployment.
- Implemented async workers + orchestration to support billions of retrieval queries and provide comprehensive evaluation metrics.
- Integrated LangChain + Claude to simulate customer workflows, logging analytics via LangSmith.

TECHNICAL SKILLS

Languages: Python, TypeScript, Java, JavaScript, SQL, VBA, C, C++, Bash

Tools: React, MongoDB, PostgreSQL, Docker, Git, LLMs, CI/CD, Linux, Figma, GCS, AWS, PowerBI

INTERESTS

Electric Guitar, Tennis, 3D Modeling, UX Design, Running, Jazz Piano
